

CloverPoint produced a Wetlands Ecozone overview map as well as a waypoints map to aid in a study of the wetlands in the GVRD by Strix Environmental Consulting.

Tasks:

- Data acquisition, creation of field map
- Digitizing of information sent from Strix Environmental
- Capturing ecosystem polygons
- Capturing polygons, and creating eco zones map
- Map creation with waypoints
- Edits to overview and waypoints map
- PDF export and posting to FTP site

Maps Displayed:

- Ecosystem polygons (terrestrial and wet land)
- Rare, threatened and endangered elements
- Unique, significant and sensitive features
- May include features relating to ecological function such as corridors, insular habitat, etc
- Invasive/exotic plants and animals
- Critical habitat features for specific organisms
